Through HOD-CE

Sub: Seeking permission to conduct Two day workshop on "Gps Instruments" -reg.

Sir,

I am writing this letter to request permission to conduct a Two Day workshop on 21st March 2024 to 22nd March 2024. I wish to conduct a workshop on "Gps Instruments" in regards to usage of Gps in Surveying and Analyse the Various Weather Conditions. I believe this will be a very informative workshop that many students will wish to attend.

M. Hema Latha
Yours Sincerely,

M.Hema Latha

Date: 21-03-2024 to 22-03-2024

Coordinators: M.Hema Latha

Organized by: Civil Engineering Department

Total Participants attended: 110

Details of Participants: Students of II & III-Year students.

Students of II year & III Year are attended the workshop on Gps Instruments with full enthusiastically throughout a day. Mr.Ramakrishna elaborately explained about Gps Instruments.The workshop was very useful as well as effective for the participants.

Why to learn?

GPS instruments work by using a technique called trilateration to calculate a user's location based on signals from multiple satellites

Atomic clocks

GPS satellites carry atomic clocks that broadcast time information in their signals. The receiver uses the time difference between the signal's broadcast time and the time it's received to calculate the distance to the satellite.

Satellite signals

Each satellite transmits a unique signal and orbital parameters. The receiver uses this information to calculate the satellite's location.

Trilateration

The receiver uses signals from at least four satellites to calculate the user's location. Each satellite creates a circle around the receiver, with the radius being the distance between the receiver and the satellite. The receiver's location is the intersection of all three circles.
