REPORT ON MATLAB & SIMULINK

Executive summary: Following points were covered with hands on training: -

- 1) Basics of MATLAB: MATLAB window, basic commands, use of variables with values, arrays, basic trigonometric functions, etc.
- 2) Function in MATLAB: defined, declared and used of the user defined functions.
- 3) Plot the graphs for given variable and check given system performance.
- 4) Live Scrip editor: It is used for series of MATLAB commands in a single interactive environment. R section in live script, create live script functions, etc. was explained.
- 5) Simulink: It is used to model the system and then simulates the dynamic behavior of the system. Control system tools were used to simulate simple PID feedback control system.
