Through: The HOD, CSE.,

SUB: Seeking Permission to Conduct Two Day Seminar On "Big Data Challenges"-Reg

Respected sir,

I Am Writing This Letter to request permission for conducting seminar on "Big Data Challenges" from 09-03-2020 to 10-03-2020 I wish to organize this seminar to get knowledge about different "Big Data Challenges" for students . I believe this will be very useful to many of the students .

This seminar is really need to understand the different Big data challenges. I believe small steps must be taken to educate everyone on the seriousness of the matter and this is one of them.

To
Mr. M.Rajesh Reddy
Lakkireddy BaliReddy College of Engineering,
Mylavaram.

Sub: Request Invitation For Delivering Expert Lecture On Two Day Seminar On
"Big data challenge's" dated from 09-03-2020 to 10-03-2020 – regd.

Respected Sir,

The Department Of Computer Science is feeling happy to invite you for giving your valuable seminar on Big Data Challenges from 09-03-2020 to 10-03-2020 as a resource person.

I request to accept the request and arrange to send the relevant study material to add in the course book a line of reply will be much appreciated

Yours sincerely
HOD-CSE

Report on Two day seminar on "BIG DATA CHALLENGES"

TITLE: "BIG DATA CHALLENGES"

Expert: Mr. M.Rajesh Reddy

Email: Rajeshmuless@gmail.com

Phone No: 9885790601

Dates: From 09th MARCH 2020 to 10th MARCH 2020

Venue: Room no F-3, Department of CSE, RKCE.

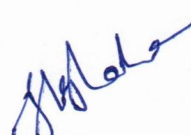

Coordinator :A.v.p. Rajesh.

Organized by: Computer Science Engineering, RKCE

Participants: students of 2-1,3-1,4-1 cse students

Details of Participants: Students of 2-1,3-1,4-1 CSE students

Students of 2-1,3-1,4-1 cse students semester are attended the seminar on "BIG DATA CHALLENGES" with full enthusiastically throughout a day. M. RAJESH REDDY has elaborately explained about the process and advantages of BIG DATA CHALLENGES". Moreover he has explained about the various types and applications of BIG DATA CHALLENGES" The detailed topics are showed in program flow. The seminar was very useful as well as effective for the participants.

A TWO DAY SEMINAR ON "BIG DATA CHALLENGES"

ORGANIZED BY THE DEPARTMENT OF C.S.E ., RK COLLEGE OF ENGINEERING

PROGRAMME FLOW (DAY 1)

Time	Speaker	Topic to be delivered
10.00 AM to 10.15 AM	K koteswar rao garu	Welcome speech
10.15 AM to 10.30 AM	Mr. sk shaabaz	Introduction about the program
10.30 AM to 11.30 AM	M RAJESH REDDY ASSISTANT PROFESSOR LBRCE Phone No: 9885790601	Big data challanges • What technology is used? • History • Technologies
11.30 AM to 11.45	<i>TEA BREAK</i>	
11.45 AM to 01.00 PM	M .RAJESH REDDY ASSISTANT PROFESSOR LBRCE Phone No: 9885790601	• Process types • How long does it take? • Advantages and disadvantages
01.00 PM to 02.00 PM	<i>LUNCH BREAK</i>	
02.00 PM to 03.30 PM	M RAJESH REDDY ASSISTANT PROFESSOR LBRCE Phone No: 9885790601	• What is a Big data challange? • Industries • Applications
03.30 PM to 04.00 PM	RECEIVED FEEDBACK AND CONDUCTED QUESTIONER BY MR.SK SHABAAZ

Acknowledgement

I would like to thank respected Mr..DR k. Ramakrishnaiah garu and Mr. k koteswarrao garu.....for giving me such a wonderful opportunity to expand my knowledge for my own branch and giving me guidelines to present a seminar report. It helped me a lot to realize of what we study for.

Secondly, I would like to thank my parents who patiently helped me as i went through my work and helped to modify and eliminate some of the irrelevant or un- necessary stuffs.

Thirdly, I would like to thank my friends who helped me to make my work more organized and well-stacked till the end.

Next, I would thank *Microsoft* for developing such a wonderful tool like MS Word. It helped my work a lot to remain error-free.

Last but clearly not the least, I would thank *The Almighty* for giving me strength to complete my report on time.

Introduction

Big data is a broad term for data sets so large or complex that traditional data processing applications are inadequate. Challenges include analysis, capture, data curation, search, sharing, storage, transfer, visualization, and information privacy. The term often refers simply to the use of predictive analytics or other certain advanced methods to extract value from data, and seldom to a particular size of data set. Accuracy in bigdata may lead to more confident decision making. And better decisions can mean greater operational efficiency, cost reductions and reduced risk.

Analysis of data sets can find new correlations, to "spot business trends, prevent diseases, combat crime and so on." Scientists, practitioners of media and advertising and governments alike regularly meet difficulties with large data sets in areas including Internet search, finance and business informatics. Scientists encounter limitations in Science work, including meteorology, genomics, connectomes, complex physics simulations, and biological and environmental research.

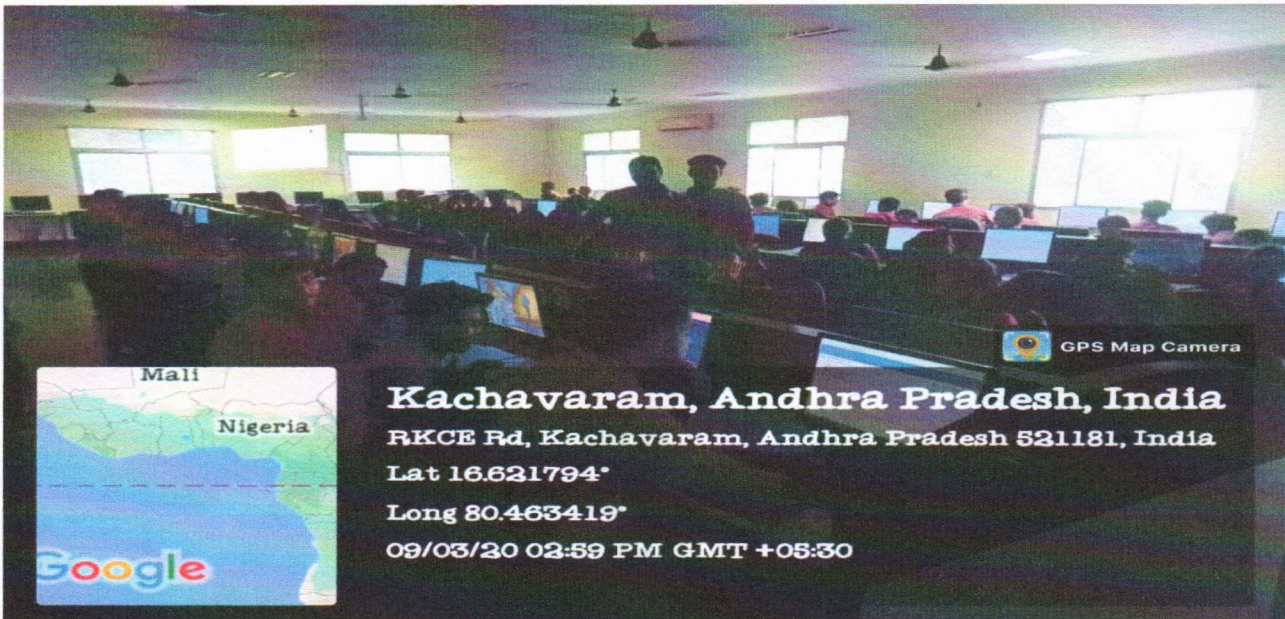

Data sets grow in size in part because they are increasingly being gathered by cheap and numerous information-sensing mobile devices, aerial (remote sensing), software logs, cameras, microphones, radio-frequency identification (RFID) readers, and wireless sensor networks. The world's technological per-capita capacity to store information has roughly doubled every 40 months since the 1980s; as of 2012, every day 2.5 exabytes (2.5×10^{18}) of data were created; The challenge for large enterprises is determining who should own bigdata initiatives that straddle the entire organization

Definition

Bigdata usually includes data sets with sizes beyond the ability of commonly used software tools to capture, curate, manage, and process data within a tolerable elapsed time. Big data "size" is a constantly moving target, as of 2012 ranging from a few dozen terabytes to many petabytes of data. Bigdata is a set of techniques and technologies that require new forms of integration to uncover large hidden values from large datasets that are diverse, complex, and of a massive scale.

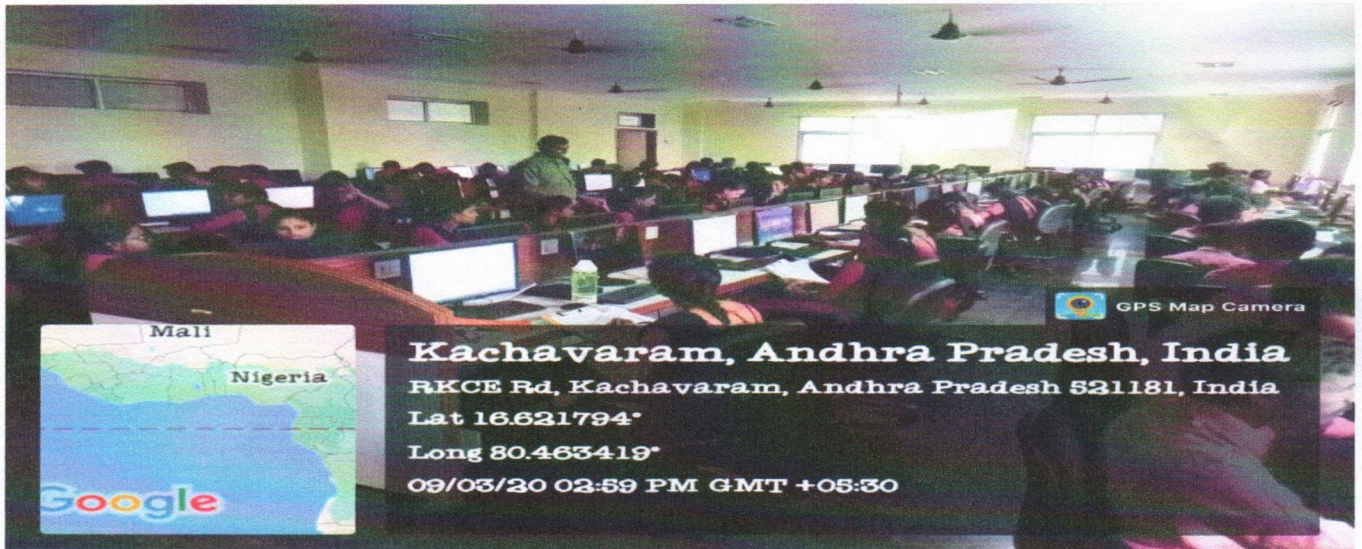

In a 2001 research report and related lectures, META Group (now Gartner) analyst Doug Laney defined data growth challenges and opportunities as being three-dimensional, i.e. increasing volume (amount of data), velocity (speed of data in and out), and variety (range of datatypes and sources). Gartner, and now much of the industry, continue to use this "3Vs" model for describing big data. In 2012, Gartner updated its definition as follows: "Bigdata is high volume, high velocity, and/or high variety information assets that require new forms of processing to enable enhanced decision making, insight discovery and process optimization. "Additionally, a new "Veracity" is added by some organizations to describe it. data with low information density to reveal relationships, dependencies and perform predictions of outcomes and behaviors.
