ABOUT THE INSTITUION:

In the hands of the most committed, highly-educated, young, energetic, enthusiastic and dynamic management; there raises a Kingdom of educational excellence.

R K holds the promise of different life; the institute was founded with the noble vision to raise professionals and leaders of high academic calibre and unblemished character, nurtured with a strong motivation and commitment to serve humanity.

Located on a sprawling campus of 30 acres, we aspire to achieve excellence in the field of technical education through diligence, dexterity and dedication, imbibing in individuals a spirit of quality consciousness, and sensitivity for the crying needs of honesty and sincere efforts, determining individuals aspiring to be technocrats to face the competition evident at global levels. Our students shall emerge as dignified, responsible, disciplined and talented citizens of our motherland and strive to continue the journey of our nation towards prosperity and success.

OBJECTIVES OF PROGRAMME:

The purpose of this programme is to teach the student how to programme in Python and prepare for a career in data science, AI, machine learning, and deep learning. The programme starts with basic concepts in python programming and takes the learners to most advanced topics in python programming.

COURSE CONTENT :

1.Basic Python Concepts

2.Introduction to Data Structures

3.OOPs,functions and modules

4.Exception Handling in Python

5.Database Connectivity

ELIGIBILITY:

Faculty members of UGC/AICTE recognised Universities and Engineering collages all over India. How ever priority will be given to the faculty members

FDP on "Realtime Application Development in Python"

Python is a General-purpose High-Level programming language. Python offers various criteria like structural, object-orientation, and functional programming for software development.

Python programming language operates on the cross-platform operating system. It is mostly used to develop a broad range of applications designed for text processing, enterprise-level using scientific, image processing, numeric and data from the network.

Course Contents:

1.Basic Python Concepts
2.Introduction to Data Structures
3.OOPs,functions and modules
4.Exception Handling in Python
5.Database Connectivity
