Through: The HOD, FED,

Respected Sir,

Sub: Request permission to conduct a Seminar on "GLOBAL ENVIRONMENTAL CHALLENGES" - Regarding.

I request you to please grant permission for conducting a Seminar on "GLOBAL ENVIRONMENTAL CHALLENGES" in the Seminar Hall From 18th DECEMBER 2018 to 19th DECEMBER 2018. I wish to conduct a seminar in regards to save our environment . I believe that this will be a very informative seminar and that many students will be much benefited.

Our students are the future of tomorrow, and they really need to understand about how all of us are polluting environment for development in the form of man- made activities, industrialization, large use and disposal of electronic waste is increasing day by day and many more wastage is increasing in developed, developing and under developed countries by simple dumping out dated electronic gadgets which resembles that today's waste effects tomorrow's future. By getting awareness on this topic every student should take a motivational step to educate everyone not to pollute environment to save themselves.

Thanking You Sir,

REPORT ON A TWO-DAY SEMINAR

Title: "GLOBAL ENVIRONMENTAL CHALLENGES"

Expert: DR.GUNNAM.NAGARJUNA

Email: gnrgjcn@gmail.com

Phone No: 9440444223

Date: from 18th DECEMBER 2018 to 19th DECEMBER 2018

Venue: Seminar Hall, Department of FED, RKCE.

Coordinators: S. Srujana

V. Haritha

Organized by: Freshmen Engineering Department, RKCE

Details of Participants: I B. Tech. CE, EEE, ME, ECE & CSE

Students of I B. Tech. CE, EEE, ME, ECE & CSE are attended the seminar about "GLOBAL ENVIRONMENTAL CHALLENGES". DR. Gunnam Nagarjuna, Resource Person, had elaborately explained about the global environmental challenges we are facing now a days. He told about various activities done by human adversely effecting environment which in return giving global warming, floods, cyclones, tsunamis, hurricanes etc. Rapid industrialization effecting agricultural fields. If we want to protect ourselves stop harming environment. Save TREES, RECYCLE, and REUSE. By this every student should know the value of all the resources. The detailed topic is showed in program flow. The seminar was very useful as well as effectively helpful for the participants.

A TWODAY SEMINAR ON "GLOBAL ENVIRONMENTAL CHALLENGES"

ABOUT THE RESOURCE PERSON

Presently working in S. R. R& C.V.R. GOVT.DEGREE COLLEGE (A), as a chemistry lecturer in the DEPARTMENT OF CHEMISTRY. He has 25 years of teaching experience in various institutions. Also, a life member of the INDIAN ASSOCIATION OF THE NUCLEAR CHEMISTS AND ALLIED SCIENTISTS, LM 1619. He is in various committees constituted by the principal, in S. R. R& C.V.R. GOVT.DEGREE COLLEGE (A).

About "GLOBAL ENVIRONMENTAL CHALLENGES":

The most serious environmental problems of the twenty-first century have the potential to alter the course of life on this planet. Global warming, toxic waste, water and air pollution, acid rain, and shrinking energy supplies are frightening challenges that may threaten our future if we do not face up to them.

Global Environmental Challenges provides important information and gives us hope about the environment. This book first helps us to grasp these difficulties, then shows us the choices we can make. How long to leave a light on, whether to take the car, the train, or bicycle to work, whether to recycle or throw away, whether to vote to curb continued suburban sprawl-all of these decisions can make a difference.

This collection of some of the best essays and articles on the environment comes from a variety of sources, including journals, magazines, websites of ecological/conservation organizations, and other publications.

Five major sections investigate the interaction of population growth, consumption, and environment; the emerging crisis in freshwater around the globe; global climate and atmosphere including global warming; biodiversity loss; and the concept of sustainable development-using natural resources to place future human development on a sustainable path.

Climate change: As global warming continues to intensify, innovative methods as well as reinforcement of traditional knowledge are necessary to mitigate its impact on heritage places and help communities adapt.

Underrepresentation: Inequities in heritage result in oversight and neglect of many significant places. Greater efforts should be made to amplify narratives that tell a more textured, just and complete story of humanity.

Imbalanced Tourism: Both over tourism and lack of visitation endanger heritage places and often sideline or disrupt local communities and their way of life. Sustainable tourism strategies are needed to recalibrate the impact of tourism and ensure just outcome for local communities.

Crisis Recovery: Armed conflict, natural disaster, and other types of destruction can cause irreparable damage to heritage places and communities. Community-led preservation efforts can participate in building resilience and regenerating the social fabric in places affected by crisis.

Many of the international problems involve the use of common pool resources - air, water, ocean and forests – that are owned by no one nation. Human and environmental impacts of the problems transcend the borders of any one country. Impacts of such problems as acid precipitation, ozone depletion and air pollution are not felt at only within countries where the problems are often created. International Environmental Problems require international Cooperation to resolve them

The Multiplication and Deepening of Environmental Problems. The rapid growth in population and its effects on resource exploitation has led to the emergence of many environmental problems. Problems such as deforestation, air pollution, acid precipitation and oil spills have become a common sight. Many people have experienced the effects of human activities on the environment such as the impacts of toxic waste dumping at Love Canal, New York and the Chernobyl nuclear fallout.
