To,

The Principal,
R K College of Engineering.

Through HOD-ME

Sub: Seeking permission to conduct a two-day workshop on “Importance on CAD projects” -regard.

Sir,

I request you to kindly grant permission to conduct a two-day ~~workshop~~ on “Importance on CAD projects”. Further, I request you to grant permission to conduct the workshop in Room no. F20 on 13th Dec – 14th Dec 2018. This Seminar will be very informative to many students.

By attending this Seminar, our students will have better understanding of the process and advantages of CAD.

P.I. consider above
request fit
2/12/18

Yours Sincerely,

Mr. Ch. prem Kumar.

Assistant professor.

Vijayawada.

Sir,

Subject: Invitation for delivering a lecture on a two-day workshop Importance on CAD projects – Reg.

Respected Sir,

The department of Mechanical Engineering, RKCE Vijayawada is organizing a two-day workshop on Career Opportunities after Graduation from 13th Dec – 14th Dec 2018. I am happy to invite you as a resource person.

I request you to accept the invitation and arrange to send the relevant study material for inclusion in the course book.

Your early reply is much appreciated.

Thanking You,

Yours Sincerely

Report on two-day workshop on “Importance on CAD projects”

Title: “Importance on CAD projects”

Expert: K Manohar Prasad

Design engineer,

Cadd solutions, Vijayawada

Date: 13-12-2018 and 14-12-2018

Venue: Room Number F20, Department of Mechanical Engineering, RKCE.

Coordinators: Mr. Ch prem Kumar

Organized by: Mechanical Engineering Department

Total Participants attended: 102

Details of Participants: Students of 2nd, 3rd Year 4th year.

Students of 2nd, 3rd Year 4th year are attended the seminar on Importance on CAD projects with full enthusiasm throughout a day. K Manohar Prasad has elaborately explained accurate design representations. CAD replaced manual design drafting, allowing design development, alteration and optimization. CAD enables engineers to craft more precise designs and manipulate them virtually.

A Guest lecture on “IMPORTANCE OF CAD PROJECTS”

By

Mr. K. MANOHAR PRASAD

About the Resource Person:

Mr. K. MANOHAR PRASAD, have an Experience of 16 years on “CAD tools like AUTOCAD, SOLID WORKS, TEKLA STRUCTURES” for different engineering design and service industries.

Venue: CAD Lab, Department of Mechanical Engineering, RK COLLEGE OF ENGINEERING, Kethanakonda, Ibrahimpatnam, Vijayawada.

Date: 16th March, 2021

Scope of event:

Every Mechanical Engineer is expected to have a good knowledge on designing. They are mostly used in the fields like Automobile Engineering, Aerospace Engineering, Tool Design, etc.

Planning and designing mechanical objects is the primary focus of mechanical engineers. They are used in producing engine and motor components or complete devices like refrigerators and robots. Design programs like AutoCAD, SOLID WORKS, TEKLA STRUCTURES help mechanical engineers to do their jobs by helping them to create preliminary designs and to spot flaws before production, resources and time saving.

Mr. K. MANOHAR PRASAD discussed about the importance of designing packages like AutoCAD, SOLID WORKS, TEKLA STRUCTURES etc., for mechanical engineer.

What is AutoCAD?

CAD stands for "Computer Aided Design." AutoCAD is a line of two-dimensional

INTRODUCTION TO COMPUTER AIDED DRAFTING

The use of interactive graphics programs to develop 2D and 3D models, assemblies, part lists, and dimensional drawings of various components, structures or objects with the help of a computer is called Computer-Aided Design(CAD). The data generated by a CAD system can be directly utilized by a CAM (Computer Aided Manufacturing) system. Thus, CAD and CAM are interrelated to each other.

CAD can be defined as the use of computer system to assist in the creation, modification, analysis or optimization of design. Computer aided design (CAD) is the process of doing design with the aid of computers. This includes generation of computers models, analysis of design data, and creation of drawings. CAD is relatively a new and rapidly expanding area in mechanical engineering. AutoCAD is used for design and mainly drafting activities. AutoCAD is developed by Autodesk Inc. in 1982.

AutoCAD is the most widely used CAD software and one of the most powerful and user friendly. AutoCAD is ideal for architects, construction engineers, managers and other professionals within the building and designing industry.

Drawing is a language of engineers. Graphic language is used among the engineers. An effective communicating tool is graphic language. Engineering drawing is widely used in mechanical, production, automobile, aeronautical, chemical, marine and electrical engineering to describe an engineering machine. Picture is better than a million words. Picture is represented by pixels. Pixel is the smallest picture on screen.

Now-a-days, Computer Aided Drafting (CAD) is becoming popular because of its simplicity and accuracy in drawing, repeatability and fast work. As per the latest method, geometric model of the object with all dimensions with physical properties can be prepared by using computers. The computer software commonly used for drafting are Auto CAD 2016, Mini CAD etc. PRO/Engineer, Unigraphics, Integrated Engineering Analysis Software(IDEAS), Computer Aided 3-Dimensional Interactive applications(CATIA), solid works, IronCAD, Mechanical Desktop(MDT) with AutoCAD 2016 are leading modelling (design) cum drafting software packages are commonly used engineering packages.

R K COLLEGE OF ENGINEERING

(Approved by AICTE, New Delhi & Affiliated to JNTUK, Kakinada & SBTET, Amaravati)
(An ISO 9001:2015 Certified Institution)
Kethanakonda (V), Ibrahimpatnam (M), Vijayawada, AMARAVATI - AP - 521456

Computer Aided Design and Drafting is a technology that is about the use of computers in the application of engineering design and development. This technology came into the market during early 80's. Since the inception, the technology has grown to a very large extent and today any engineering project is nearly impossible to think of without this technology.

No need to make an expensive prototype and test it, by putting it into actual working conditions. This saves a lot of time and money that is involved in the design process. Based on the test results, in no time the design can be modified and analysed once again.

If you are into the architectural design project, you can build a full size model of your work on the computer screen, add lights and even have a walk through the model that you are dreaming of no brick, no paint, nothing. Today, the technology has grown to that extent.

MERITS OF CAD OVER MANUAL DRAFTING:

- 1) Design can be consistently accurate, clear and faster.
- 2) Drawings are stored in electronic format in computers. With sufficient backup space required for is far lesser than required for storing the man made paper drawings.
- 3) Documents can be maintained safely for a longer period. No natural factors such as moisture could spoil the documents.
- 4) Retrieval of documents is faster than that of manual drawings.
- 5) Editing and modification of drawing is easy.
- 6) Directly we can construct and visualise a 3D model. The CAD software can quickly produce the orthographic views of component or assembly.
- 7) Repetitive and time consuming activities such as cross-hatching, dimensioning can be done much faster care at any time.

(An ISO 9001:2015 Certified Institution)
Kethanakonda (V), Ibrahimpatnam (M), Vijayawada, AMARAVATI - AP - 521456

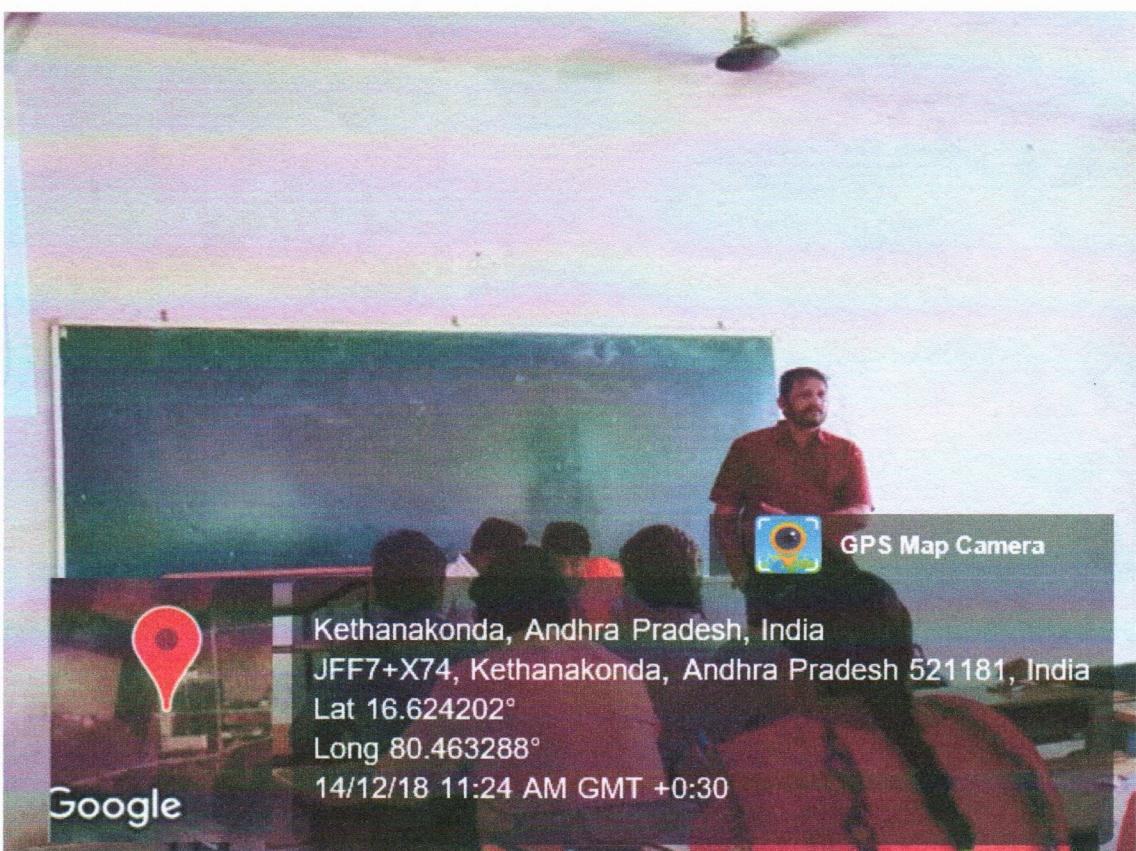

- 8) We can simulate real life situations such as wind, sun light, pressure and temperature and visualise how the model or design would react in a given situation.
- 9) There is flexibility in design.
- 10) Design analysis is made
- 11) Fewer design errors.
- 12) There is improvement in design with shorter lead time.

AutoCAD has several features:

- Group related parts of the drawing together and turn their display on or off at will.
- Manipulate drawing entities separately or in groups as though they were a single drawing entity.
- Create an unlimited library of custom-made drawing entities and symbols and insert them into different drawings at will.
- Add dimension information to your drawing easily by selecting relevant points on a drawing entity.
- AutoCAD by means of command scripts that execute a series of commands in sequence. This can also be done by programming AutoCAD with Auto LISP.
- Create drawings that can be exported and used in other graphics programs.
- Construct 3D wire-frame models of objects in 3D space and view them from any angle.
- Create sectional views of 3D entities automatically by using an AutoCAD feature called clipping planes to temporarily block out selected portions of the drawing.
- Advanced versions of AutoCAD are icon based and provides solid modelling features like other high end CAD packages.
