SUB: Seeking Permission To Conduct Two Day Seminar On “ E Ball Technology”-Reg

Respected sir,

I Am Writing This Letter to request permission for conducting seminar on computer peripheral from 31-1-2018 to 01-02-2018 @ 10 A.M . I wish to organize this seminar to get knowledge about e ball technology for students. I believe this will be very useful to many of the students.

This seminar is really need to understand the different working parts of a computer. I believe small steps must be taken to educate everyone on the seriousness of the matter and this is one of them.

Yours sincerely

Report on Two day seminar on "E-ball Technology"

TITLE: "E-Ball Technology"

Expert: Mr. M.Nagesh babu

Email: nahgeshmydeedi@gmail.com

Phone No: 9885769666

Dates: From 31st january 2018 to 1st february 2018

Venue: Room no F-3, Department of CSE, RKCE.

Coordinator: P.V.SIVA RAM KRISHNA

Organized by: Computer Science Engineering, RKCE

Participants: students of 2-1,3-1.4-1 cse students

Students of 2-1,3-1.4-1 are attended the seminar on "E BALL TECHNOLOGY" with full enthusiastically throughout a day. M NAGESH BABU has elaborately explained about the process and advantages of "E BALL TECHNOLOGY". Moreover he has explained about the various types and applications of "e BALL TECHNOLOGY" The detailed topics are showed in program flow. The seminar was very useful as well as effective for the participants.

CONCEPT OF E-BALL

The E-BALL is a sphere-shaped computer. Apostol Tnokovski decided to give sphere shape to the pc because he considered the sphere to be the most attractive shape in the nature that gathers the attention of all.

The body of E-BALL is made up of aluminium and plastic parts.

ALL is the smallest among all the PCs developed so far as it has 120x120mm motherboard and is 6 inch in diameter.

The E-BALL pc has all the features and elements of conventional computer like mouse, keyboard, display etc

WORKING OF E BALL

The first thing before starting the E-BALL pc is to put it into standing position. For this press the two buttons on the sides of E-BALL for 5 seconds and the stands are automatically opened and adjusted so as to hold the E-BALL PC in position.

After this the on / off button on the top of E-BALL must be pressed to turn on the PC and the projector pops up. After this the focus, direction etc can be adjusted using the navigation buttons. Opening of the stands and switching on the E-BALL pc is as shown above

When the stand has been opened and the system has been turned on, it becomes functional only when the screen or the display unit is available

The display unit is not physically present or attached on to the E-BALL. Rather, with the help of the projector popping up out of the E-BALL PC, the display unit can be projected on to the wall which can work as screen
