Personality enrichment is considered to be a process that takes place and continues throughout the lives of the individuals. Personality enrichment is required for a number of reasons; no individual is regarded to be perfect; there are strengths and weaknesses in all individuals. When a person recognizes his weaknesses and makes an attempt to improve them, then it is stated to be a beginning that leads to the enrichment of one's personality. An individual requires the enrichment of his personality in order to keep his progression and affluence integral. The personality of the individual is formed by the total of thoughtful forms, routines, character genes and the effects of the environment.

The main aspects that contribute towards the personality enrichment of an individual are, healthy and clean mind and body, one should not possess any kinds of ill feelings against anybody. One is required to be truthful and deferential in ones thoughts and actions, an individual's performance and communication should be honest and respectful. Loyalty of a person towards oneself is considered an important aspect for the personality enrichment. One should always think positive and possess an enthusiastic spirit even towards the performance of difficult tasks. Pleasurable voice and soft manners contribute in the personality enrichment as this attitude enables a person to eliminate the feelings of anger and frustration within himself. Sometimes an individual is involved in the performance of multiple tasks, such as management of the household functions, jobs, education and so forth, therefore, it is vital for him to possess an aspiration to do well in all areas.

Awareness of oneself – When an individual is existing in a society, attending an educational institution, is engaged in an employment opportunity, looks after the family members, then he possesses information and knowledge of all the areas that are of his concern. Besides, the environmental and other kinds of information, it is vital for an individual to possess the awareness about himself; adequately identify his own strengths and weaknesses and also identify any kinds of inconsistencies within an environment, that are required to be improved.
