Sub: Seeking permission to an internship at Micro Link Information Technologies-reg

Sir,

I am writing this letter to request permission to do an internship in Micro Link Information Technologies from 07th April 2021 to 23rd April 2021. The objective of this internship is to Develop communication, interpersonal, and other critical skills in the job interview process. I believe this will be very informative and useful to the students.

So please consider the request to do an internship in Micro Link Information Technologies.

Yours Sincerely,

Mr. Ch D V Nookaraju.

Subject: Request for internship

Sir/ Madam,

I am writing this letter on behalf of R K College of Engineering in order to inform you that the following students are looking forward to joining the internship program from 07th April 2021 to 23rd April 2021 in your esteemed company. As per the curriculum, the following students need to join a 15-day long internship and attain a certificate after satisfactory training.

It will be a golden opportunity for the students as they will get to learn a lot of new things. It is to request you to kindly allow the following students to join the training program from your reputed company.

Thanking you

A Report on ADVANCED SOLID WORKS- SURFACE MODELLING

- Explore a modelling technique using planar or non-planar geometry with **zero thickness**.
- Understand and apply **Surfacing features** such as Extruded Surface, Revolved Surface, Lofted Surface, Boundary Surface, Filled Surface, Delete Faces, Trim Surface, Knit Surface and Thicken in a SolidWorks design model.
- Understand the use of **spline** sketching tool in the creation of curves objects and manipulation of their properties to design surfaces.
- Explore the use of **Sketch Pictures** in the creation of a design solution when using Surfaces.
- Develop a better understanding of the creation of photorealistic images when using **Photoview 360**.
- Develop an understanding of **master-modelling techniques** in the design of objects.

Report on CAD & CAE Model Verification Tools Using Hyper Works

This tool allows engineering analysts to validate CAD models received from the design teams, automatically identifying potential issues that could slow down the pre-processing stage of the simulation life cycle. The solution identifies part intersections, missing welds and incorrect bolt-nut positions on an entire assembly structure and generates comprehensive reports.

This webinar is focused on analysis workflows that address NVH, durability, fatigue, and optimization requirements applied to complex Automotive systems, all within the same solver environment and using just one input format. The efficiency gains from adopting these workflows have also been attested by OEMs.
