To
The Principal,
R K College of Engineering.

Mrs. R. Sujatha Rani
Freshmen Engineering Department,
R K College of Engineering.

Through: The HOD, FED,

Respected Sir,

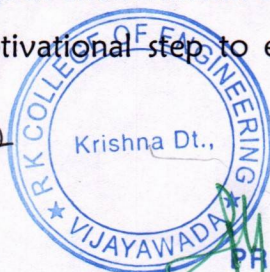

Sub: Seeking permission to conduct seminar on "E-WASTE MANAGEMENT"-Reg.

I request you to please grant permission for conducting a Seminar on "E-WASTE MANAGEMENT" in Seminar Hall from 12th MARCH 2020 to 13th MARCH 2020. I wish to conduct a seminar on "E-WASTE MANAGEMENT" in regards to control the electronic waste disposal by human activities. Because day by day large amount of E-waste is dumping into environment without proper treatment. I believe that this will be a very informative seminar that many students will wish to attend.

Our students are the future of tomorrow, and they really need to understand about how much of electronic waste is increasing day by day in developed, developing and under developed countries in the form of outdated electronic gadgets. Million tons of wastage is increasing by foreign countries which has to be recycle. They should know the importance of all the resources in environment. By getting awareness on this topic every student should take a motivational step to educate everyone to separate E-waste from other waste material.

Thanking You Sir,

forwarded to principal

REPORT ON A TWO-DAY SEMINAR

Title: "E-WASTE MANAGEMENT"

Expert: MR.G.VIJAYA SWAROOP SINGH

Email: vijayssgaddala@gmail.com

Phone No: 9848240030

Date: from 12th MARCH 2020 to 13th MARCH 2020

Venue: Seminar Hall, Department of FED, RKCE.

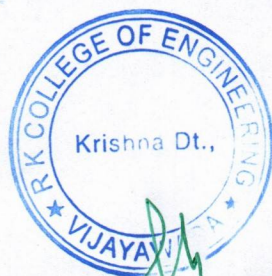

Coordinators: CH. ADILAKSHMIDEVI
M. Radha Sirija

Organized by: Freshmen Engineering Department

Participants: I- B.Tech. CE, EEE, ME.

Students of I-B. Tech. CE, EEE, ME are attended the seminar about "E-WASTE MANAGEMENT". MR. G. Vijaya Swaroop Singh, Resource Person, had elaborately explained about the Proper disposal of E-Waste Management. If everybody dumps E-Waste separately we can extract precious metals from that and the plastic can be recycled. By this topic every student aware of proper disposal of E-Waste without harming surrounding for better future. The detailed topic is showed in program flow. The seminar was very useful as well as effectively helpful for the participants.

A TWODAY SEMINAR ON “E-WASTE MANAGEMENT”
ORGANIZED BY THE DEPARTMENT OF F.E.D., RK COLLEGE OF ENGINEERING

ABOUT THE RESOURCE PERSON

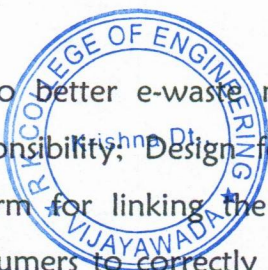

Presently working in SRR& CVR GDC(A) as Lecturer in the DEPARTMENT OF CHEMISTRY. He has 20+ years of teaching experience in various institutions. Also a member in various committees constituted by the Principal, SRR& CVR GDC (A), like Tax Verification Committee, Committee for Development of Research Pedagogical Tools.

About “E-WASTE MANAGEMENT”

Electronic waste, as known as e-waste, is generated when any electronic or electrical equipment becomes unfit for the intended use or if it has crossed its expiry date. Due to rapid technological advancements and the production of newer electronic equipment, the old ones get easily replaced with new models. It has particularly led to an exponential increase in e-waste in India. People tend to switch to the newer models and trending technologies; also, the lives of products get reduced with time. But the issue is left with e-waste management in India and its challenges.

Consumers are the key to better e-waste management in India. Initiatives such as Extended Producer Responsibility, Design for Environment; (3Rs) Reduce, Reuse, recycle technology platform for linking the market facilitating the circular economy aim to encourage consumers to correctly dispose of the e-waste, with an increased reuse and recycling rates, and also adopt sustainable consumer habits.

In many developed countries, e-waste management is given high priority. In contrast, in developing countries, it is exacerbated by completely adopting or replicating developed countries' e-waste management and several related problems, including a lack of investment and technically skilled human resources. In addition, there is a lack of infrastructure and the absence of appropriate legislation, specifically dealing with e-waste. Also, there is an inadequate description of stakeholders' and institutions roles and responsibilities involved in e-waste management, etc.

E-waste poses the huge risk to humans, animals, and the environment. E-waste typically consists of plastics, metals, cathode ray tubes (CRTs), printed cables, circuit boards, and so on. The valuable metals like copper, silver, gold, and platinum can be reused from e-wastes once they are scientifically processed. The presence of toxic substances like liquid crystal, lithium, mercury, nickel, selenium, polychlorinated biphenyls (PCBs), arsenic, barium, brominated flame retardants, cadmium, chrome, cobalt, copper, and lead makes it very hazardous, in case e-waste get dismantled and processed in a crude manner with the rudimentary techniques.

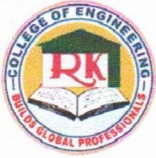

The computers, mainframes, servers, monitors, printers, scanners, compact discs (CDs), copiers, calculators, battery cells, cellular phones, fax machines, transceivers, TVs, medical apparatus, iPods, refrigerators, washing machines, and air conditioners are examples of e-waste when they become unfit for its use. The presence of highly toxic substances and heavy metals like mercury, lead, beryllium, and cadmium pose a significant threat to an environment even in minute quantities.

E-waste recycles in India is predominantly an informal sector activity. There are thousands of poor households eking a living from scavenging materials from waste dumps. The common recycling practices for middle-class urban households, particularly for waste paper, plastic, clothing, or metal, is to sell out to small-scale, informal sector buyers often known as 'kabadiwalas,' and they further sort and sell these as an input material to artisanal or industrial processors.
